

Professional Summary

Detail-oriented Full Stack Developer with experience in backend and frontend technologies, cloud computing (Azure), and AI/ML model development. Proven ability to build scalable web & mobile apps, lead technical events, and contribute to open-source communities. Certified in AZ 204, DP 900 and AZ 900

EXPERIENCE

Software Development Intern, Bluestock (Fintech)

Jan 2025 – April 2025

- Developed **scalable APIs using Django REST Framework** for financial services.
- Collaborated on **real-time data processing and secure user authentication modules**.
- Integrated frontend interfaces with secure, performance-optimized backend.

Software Development Intern, KudoAI

Aug 2024 - Present

- Engaging in **technical writing**, focusing on creating clear, concise documentation for AI-based.
- building **cross-platform chat application using React Native for the frontend and Node.js + Express for backend APIs**.
- Implemented **real-time messaging and user authentication with Firebase Firestore and Firebase Auth**.

Research Intern, PESU Research Foundation

June 2025 - July 2025

- Developed an **end-to-end "Multilingual Crop Health Narration System" using a microservices architecture** to convert drone imagery into actionable insights for farmers.
- Engineered a lightweight **Dual Attention Binary Neural Network (DABNN) for crop disease classification, achieving 98% test accuracy with a highly efficient 2.2 MB model size**.
- Implemented a **generative AI pipeline using RAG and GPT-4** to translate complex model outputs into natural language reports in multiple Indian languages.
- full-stack system delivering multilingual PDF and audio reports via a web and mobile (React Native) (Next) application.**

POSITIONS OF RESPONSIBILITY

Microsoft, Microsoft Learn Student Ambassador (MLSA)

Jan 2024-Present

- Grown a community of over 400 participants** by organizing and **hosting technical workshops** on topics including **Azure, Python, Power Platform, and GitHub**.
- Managed the **end-to-end execution of large-scale technical events**, from planning hands-on workshops to distributing rewards to winners.

Licenses, Certifications and Additional Courses

• Microsoft Certified: Azure Data Fundamentals • Microsoft Certified: Azure Fundamentals • Microsoft Certified: Azure Developer Associate • Generative Language Model • Transformer Models and BERT • GitHub Foundations • Career Essentials in Generative AI • Python Programming • Machine Learning Models • Azure Bot Service • Classification Models • Data Analysis with Python • Deep Learning Models • Coursera IBM GenAI & ML Training

Education

PES University, Bachelor of Technology in Computer science And Engineering (**B.Tech**) **7.63 CGPA** 2023- Present

Languages: Python, JavaScript, C++, C, SQL, HTML, CSS, Dart, Go Lang

Frameworks & Libraries: Django, Flask, React.js, Node.js, Express, Next.js, React Native, Flutter, Tailwind CSS

Databases: PostgreSQL, MongoDB, Azure Cosmos DB, Cassandra DB, MySQL

Cloud & DevOps: Azure, Google Cloud, Docker, Git, Nginx, Firebase, REST APIs, CI/CD (GitHub Workflows), Prisma

AI/ML: CNN, BNN, DABNN, Automated Machine Learning, Vertex AI, Azure Computer Vision

Methodologies: Agile, Scrum, MLOPS, Technical Writing

Projects

Full-Stack Image Processing and Classification Web App

Developed a full-stack platform using a **React.js** frontend, a **Flask** and **OpenCV** backend, and a **PostgreSQL** database to classify images with **YOLOv5**. The application was containerized with **Docker** and deployed on **Azure** with a **CI/CD** pipeline via **GitHub**

Actions.

Walkez – Smart Pedestrian Safety App (Google Developer Solution Challenge 2024)

Led the end-to-end development and managed the team for a pedestrian safety application. Integrated **Azure Open AI** for real-time object detection, used **Firebase** for authentication and database services, and implemented **AzureMaps API** for dynamic routing,

DNS Configuration, hosted in **Azure VM** and **Azure app services**

Open Source Contributions

Hacktoberfest (2023 & 2024) & Social Summer of Code (2024), Contributor

Made significant contributions to repositories focused on **web development** and **Python automation**, engaging in tasks like **bug fixes**, **feature development**, and project refactoring. Collaborated with developers worldwide to improve project workflows and documentation, gaining experience in code reviews and version control.

Social Winter of Code (2025), Project Admin for WALKEZ

Served as **Project Admin**, leading **technical planning**, issue triaging, and contributor onboarding for the WALKEZ project.

Reviewed and merged pull requests, provided constructive code feedback, and managed project milestones to ensure adherence to open-source standards.

Mentored student contributors, fostering an environment where they could gain hands-on experience in **AI**, **Flutter**, and **cloud technologies**
